STOP DIRT IN ITS TRACKS: SEBO DUO CLEANING SYSTEM

Pure Performance

THE SEBO DUO CLEANING SYSTEM EASY TO USE. FAST AND EFFECTIVE

This dry cleaning system is formulated to DEEP CLEAN your entire carpet or spot clean stubborn stains – all without soaking your carpet. The SEBO duo Cleaning System – quick, easy and highly effective!

- The advantages of using the SEBO duo Cleaning System:
- alleviates house dust allergies
 - immediate use of the carpet
 - cleans most types of carpet
 - no need to move furniture
 - no shrinking or mildew
 - no detergent residue
 - easy to clean stairs
 - easy spot-cleaning
 - a built-in fiber protector helps to protect your carpet against future stains and soil

THE PERFECT TEAM - THE SEBO DUO BRUSH MACHINE AND THE DUO-P CLEANING POWDER

The duo Brush Machine features motor operated brushes which open the carpet pile enabling the duo-P powder to clean around each separate fiber.

HOW IT WORKS:

The SEBO duo-P Cleaning Powder is made up of granules that are moistened with detergent and is environmentally friendly and safe to use. When the granules are worked into the carpet fiber, soil and stains are lifted out of the carpet by the duo-P powder. The duo Brush Machine lifts the carpet pile ensuring all surfaces of the fiber are cleaned, leaving your carpet revived and softer. After vacuuming, your carpet is clean, dry and ready for use.

An added advantage in using duo-P Cleaning Powder on your carpet is that once applied, a built-in fiber protector will help to protect against future damage from soiling or staining.

The SEBO duo-P Clean Box is an environmentally friendly refillable container – when you have used the contents, you can replace the inner bag with an inexpensive refill pack of duo-P Cleaning Powder. The lid has a built-in brush for spot cleaning

The duo-P Powder refill box comes with five (1.1 lb each) packs. The refillable Clean Box has a 1.1 lb pack. Each single 1.1 lb. pack can cover up to 250 square feet of carpet.

SEBO DUO-P CLEANING POWDER ALLEVIATES HOUSE DUST ALLERGIES

The GAF allergy research center in Germany found in a long term test that, six months after a single cleaning with duo-P, seven out of ten carpets remained free of dust mite allergens.

Because this is a DRY cleaning process, the SEBO duo-P Cleaning Powder WILL NOT PROMOTE THE GROWTH OF MOLD AND FUNGUS in your carpet and pad that wet extraction systems may cause. By reducing dust mite allergens, pet allergens, bacteria and mold spores, the SEBO duo-P Cleaning Powder helps maintain indoor air quality for a healthier home.

SEBO DUO DAISY

The newest addition to the SEBO duo carpet cleaning team

You don't have to get down on your hands and knees with a hand brush. This sturdy adjustable handle allows you to work at a comfortable and ergonomic operating position. Simply twist and slide the retractable telescopic handle to the desired height, then tighten.

The radial curvature of the duo Daisy brush allows uniform distribution of the duo-P dry cleaning powder. The side wheels give support to the brush block when it is buried in the carpet. It also creates a constant angle for the brush to clean effectively.

The duo Daisy offers two brush settings - Easy or Aggressive. This gives you the flexibility to clean different types of carpet.

The duo Daisy is easy to clean - simply run it under tap water. It's lightweight, durable and has a retractable handle allowing it to be stored in a smaller space. You can also use the duo Daisy to clean cars, boats and RV's.

duo-P, the carpet cleaner that removes virtually ANY kind of stain.*

*Will not remove stains which have dyed the carpet fiber.

WHY USE DRY EXTRACTION?

Wet cleaning methods inject hot water and detergent into the carpet pile under pressure. A vacuum is then used to extract the liquid and dissolved soil. It is impossible to vacuum all of the dissolved soil from a wet carpet. Many machines only remove 50% of the dirty water. Carpets may resoil quickly and spots may reappear as the moisture wicks back up the carpet fiber. A wet carpet may take 8-36 hours to dry depending on humidity. That's long enough for mold spores to grow. In fact, biological allergens thrive and multiply in moist or damp areas.

Dry cleaning is safer for most carpets - it will not shrink the carpet or cause water staining if applied unevenly. SEBO duo-P Cleaning Powder leaves no detergent residue to cause your carpet to resoil, and the carpet can be used immediately after cleaning.

Extend the life of your carpets by not only vacuuming regularly, but also cleaning them regularly. Owning your own system is convenient and cost effective. Your carpets get cleaned when YOU want them cleaned and without having to let strangers into your home.

THE SEBO DUO CLEANING SYSTEM SIMPLE AND EASY TO USE

To spot clean stubborn stains:

- Spread a small amount of duo-P powder onto the soiled area (a).
- Gently work the powder into the carpet using the brush provided with the SEBO Clean Box (b) or use the duo Daisy (c). Older or more stubborn stains may require further treatments. Simply repeat the process until the stain is completely removed.
- Once the duo-P powder has absorbed all of the dirt and the area is dry to the touch (approximately 30 minutes), vacuum the area thoroughly (d).

To clean the entire carpet:

- Spread duo-P Cleaning Powder evenly over the carpet (a).
- Work the powder into the carpet using the SEBO duo Brush Machine (b), or the duo Daisy (c).
- Once the duo-P powder has absorbed all of the dirt and the area is dry to the touch (approximately 30 minutes), vacuum the area thoroughly (d).

SEBO DUO BRUSH TECHNICAL DATA*

Brush motor	200 Watts, 1.8 Amps
Width	14 inches
Height	4-11/16 inches
Body weight	11 lbs.
Brush speed	400 rpm
